

The company CETIN expects its results for the year 2018 will be in line with the long-term trend

5 February 2019

The company Česká telekomunikační infrastruktura a.s. ("**CETIN**") expects **its financial results for the year 2018 will be in line with the long-term trend**, established by the published results of the previous years and of first half-year 2018.

Following the first indicative information regarding the full year 2018 the company CETIN expects a moderate year-on-year decline in the domestic network services segment, driven mainly by the decline of the revenue from so called mass services and revenue from data services. The company CETIN also expects year-on-year decline within the services of international voice transit especially due to changes on respective market. The impacts of this decline are partly compensated by the growth of revenues particularly from mobile services. The company CETIN has continued boosting strategic investments to the development of new generations of fixed and mobile networks.

The audited CETIN's financial results of the year 2018 in full are going to be published as a part of CETIN's Annual report for the year 2018 which is expected to be released during the beginning of March 2019.
